PRESS RELEASE

Website: www.miponline.com

COVINA, CA, USA - November 2009 - Moore's Ideal Products LLC, Manufacturer of Top Selling Hop Up parts for the RC Car Industry, Announces the Release of an update on our C-CVD™ Capture Ring.

The MIP C-CVD™ Capture Ring will no longer be **RED**. We have made a change in material and they will now be "Dyable Capture Rings". They are made of a **Dyable** Nylon, and using normal "RIT" dye you can make them any color you desire to match your car. Not only **Dyable** for fun, but it is a much stronger material, and more impact resistant. This is a running change in the C-CVD™ products listed below as well as all new C-CVD™ Kits. MIP is always looking to improve and update our products, and we have done it again!

The following kits will be affected by this change.

08106 MIP C-CVD™ Kit, Slash-Nitro Rustler & Stampede (2)
08107 MIP C-CVD™ Re-build Kit, 3/16"
08123 MIP C-CVD™ Kit, All Elec Rustler & Stampede (2)
08125 MIP C-CVD™ Kit, B4/ B4RTR, Associated (2)
08127 MIP C-CVD™ Kit, T4/ T4RTR, Associated (2)
08129 MIP C-CVD™ Kit, GT2, Associated (2)
08131 MIP C-CVD™ Kit, XXX/ CR/ & XX, Losi (2)
08133 MIP C-CVD™ Kit, XXXT/ CR/ XXT, Losi (2)
09104 MIP C-CVD™ Kit, Jato, Traxxas
09121 MIP C-CVD™ Kit, Mini-T Series, Losi
09122 MIP C-CVD™ Rebuild Kit, Mini Series
09128 MIP C-CVD™ Kit, SC10, Associated

There are no recalls on the **RED** rings. It will just be a running change in packaging. Another great update on MIP products.
